

## Spare Parts Kits

Automated Packaging's Spare Parts Kits are available in three levels, allowing you to choose the degree of protection that best suits your operational requirements:

### Basic

Includes the most common wear items to conduct simple, on-site repairs and preventative maintenance service.

### Intermediate

Includes the components of the Basic Spare Parts Kit, along with additional items for more thorough protection against potential downtime.

### Major

Includes the components of the Intermediate Kit, along with additional repair parts for optimum protection in high-productivity operations.

### Don't get caught without Spare Parts from Automated Packaging Systems when you need them most!

# Don't Get Caught With Your Parts Down.

Because you've chosen **Automated Packaging Systems** for your bag packaging needs, you've experienced the **high quality** and reliability our systems deliver. But parts wear, and even the **best machines** need periodic maintenance to run optimally.

Downtime can cost your business hundreds of dollars per hour. Don't get caught without spare parts from Automated Packaging Systems when you need them most. Maintaining an inventory of spare parts on-hand helps prevent valuable lost production time and keeps your packaging system – and your business – operating at peak performance.

At Automated Packaging, **we take standard spare parts and bundle them into convenient, ready-made kits**, so you have everything you need to support on-site service and preventative maintenance requirements. We know which parts wear the fastest and need replacing first – and those are the parts that go into our Spare Parts Kits.

**All parts are not created equal.** Parts change. Specs change. Don't risk the potential for alternate source substitution, obsolescence, or out-of-stock issues that could arise from a third-party provider. Our professional engineering staff keeps up with the changes for you, ensuring that you always have the right spare parts at the right time.

### Why Source Parts from APS?

- We stock over \$2 million and 8,000 SKUs in spare parts inventory – **Ready for immediate shipping to your location**
- **Convenient, ready-made kits** are easy to store on-site and include the most common wear items
- **Service Expertise** by phone, in factory, or in person – Parts are backed by factory-direct technicians who help to keep your system operating at optimum performance levels
- **Highest Quality** parts that are up-to-date, guaranteed to run on our machines, and won't adversely impact your equipment performance or warranty
- **Maintenance Training Courses** help your internal team to identify and perform basic parts replacement and maintenance functions on-site
- Environmentally-friendly **Parts Exchange Program** reconditions parts to reduce costs, and comes with a factory warranty – *Same day shipping*
- **Preventative Maintenance Contracts** extend equipment life, maximize performance, and may include automatic parts replacement or recommendations
