

Scratch Resistant Film (NSCR)

NSCR scratch resistant film is ideal for packaging products with high gloss finishes or surfaces that are sensitive to abrasion.

This low density polyethylene film contains no anti-block additives, which are used to prevent polyethylene bags from sticking together, but can cause minor surface chafing to the packaged product. Instead, a unique embossing technique creates a highly durable and flexible bag that machines easily yet eliminates abrasive properties.

Genuine Autobag® bags-on-a-roll are system-matched and guaranteed to run on all Automated Packaging Systems bagging equipment.

User Benefits

- Flexible, high strength
- Protects against surface abrasion
- Reduces product returns and damages

Typical Applications

- Eyewear
- Jewelry
- Electronics
- Medical
- Retail
- Any application that requires non-abrasive protection

Technical Specifications

Compliances: N/A
Press Printing: Yes
Imprinting: Yes
Trim Seal: No
Mil Thickness: 2.0
Configuration: Autobag

Performance Data:	U/M	2.0/SD	ASTM
Haze	%	N/A	D-1003
