

## Spare Parts Kits – SPrint PI 412cw Imprinter

How much does downtime cost your business? Maintaining an inventory of spare parts on-hand could prevent valuable lost production time and keep your packaging system operating at peak performance.

At Automated Packaging Systems, we manufacture reliable, high-quality bag packaging equipment that is designed for maximum productivity and uptime. For every bagging system we build, a variety of Spare Parts Kit options are available to support on-site service and preventative maintenance requirements. Our comprehensive Spare Parts offering makes it easy for you to source and secure the genuine SidePouch™ parts you need, when you need them – without the potential for alternate source substitution, obsolescence or out-of-stock issues that could arise with a third-party provider.

Spare Parts Kits are generally available in three levels: Basic, Intermediate and Major. Choose the level of protection that best suits your operational requirements.

- Basic: Includes the most common wear items to conduct simple, on-site repairs and preventative maintenance.
- Intermediate: Includes the components of the Basic Kit, along with additional items for more thorough protection against downtime.
- Major: Includes the components of the Intermediate Kit, along with additional items for optimum protection in high-productivity operations that require immediate repair.
