

At Automated Packaging Systems, we help customers achieve their goals by providing a Total Systems Approach to packaging. We work closely with our customers to understand their key issues and requirements. We evaluate the entire packaging process, including machinery, materials and services. Then we develop complete packaging solutions that increase our customers' productivity and profitability.

Systems Advantage Program Rewards	Benefit	Systems Advantage Member	Non-Member
Machines			
Extended Warranty Incentives*	Worry-free service on machinery purchases	⊙	Available at list price
Software Upgrade Incentives*	Ensures your system technology remains state-of-the-art	⊙	Available at list price
Purchase Incentives	Enables even faster Return on Investment (ROI)	⊙	—
Trade-in Incentives	Allowances for upgrades into next-generation machinery	⊙	—
Installation, Set-up and Training Incentives*	Enables fast and accurate start-up of your new system	⊙	Available at list price
Materials			
System-matched Genuine Bags	Guaranteed to run for optimum productivity	⊙	⊙
Premium Delivery Service Incentives	Reduces the impact of unplanned shortages	⊙	Available at list price
Art Incentives	Professional design support and fast turnaround under one roof	⊙	Available at list price
Service			
Priority Service Scheduling	Rapid response for maximum uptime	⊙	—
Factory and Field Service Rate Incentives	Factory-direct experience ensures the best quality service	⊙	Available at list price
Spare Parts Incentives	Stock and replace common wear items without the hassle of third-party sourcing	⊙	Available at list price
Preventive Maintenance Incentives	Optimum performance and long equipment life	⊙	Available at list price
Maintenance Training Incentives	Identify and perform basic maintenance functions on-site	⊙	Available at list price

The Systems Advantage™ Program combines Machines, Materials and Services into a comprehensive program designed for superior packaging performance and maximum value. Systems Advantage members enjoy the convenience of a single-source solution to their packaging needs, and further benefit from a variety of incentives and preferred services to optimize every aspect of their packaging operation.

Call Automated Packaging Systems at **1-888-AUTOBAG** to learn more about the benefits available to qualified Systems Advantage Program members.

Automated Packaging Systems, Inc.

Automated Packaging Systems has been providing innovative products and exceptional customer service since 1962. The company invented the first bag-on-a-roll products and named them Autobag®. Today, we are a global supplier of a full line of automated packaging equipment, including bagging systems, void-fill air pillow systems, infeeds, imprinters and custom engineered solutions to meet the unique requirements of our customers. With over 25,000 machines in operation around the globe, our products are recognized for providing world-class packaging performance.

The Total Systems Approach

In any good packaging operation, total system performance is dependent on how well each individual component works with the others. Automated Packaging designs all of its products and systems to work efficiently together in an integrated operation. Bags are designed to work with machines and operator controls are designed to be user-friendly.

When customers purchase machines, materials and services from Automated Packaging, they may qualify for the Systems Advantage™ Program, which rewards its members with a variety of incentives and preferred services to optimize the performance and value of their packaging operation.

Our Commitment to Quality

Automated Packaging Systems is committed to designing and manufacturing the highest quality products and backing them with exceptional customer service. The company's quality management system is certified to ISO 9001/2000* standards.

PACKAGING SYSTEMS

Machines

Automated Packaging Systems, Inc. is an industry leader with multiple patents and a global reputation for the best-built bagging systems available. Innovation and quality have always been our strength and commitment.

Innovation

Whether a stand-alone bagger or fully integrated system, every unit we build is engineered with the most advanced technologies for high productivity and operating efficiency. Innovative new product features include an operator-friendly AutoTouch™ Control Screen, DeviceNet integration, and Ethernet communications capabilities. A modular E-box and valve packs, on-board diagnostics, and simple Replace-n-Repair™ technology maximize uptime.

Quality

With over 40 years of experience in designing and manufacturing packaging equipment, our bagging systems are among the most reliable in the world. From comprehensive testing that meets CE standards to a rigorous final inspection, each machine is built to run at peak performance.

System Integration

Automated Packaging Systems offers a complete line of infeeds, printers and accessories for high productivity environments. Our fully integrated bagging systems range from simple tabletop models to semi- and fully-automatic systems involving weighing, counting, conveying, kitting and printing.

Custom Engineering

Automated Packaging Systems works closely with customers who require custom engineered packaging solutions. We design, test, manufacture and service all of our specially engineered systems with the same high level of quality provided on our entire line of bagging equipment.

Automated Packaging Systems, Inc. was the first company to develop the pre-opened bags-on-a-roll concept more than 40 years ago. The company patented its design in 1967 and has been a leader in high-quality bagging materials ever since.

System-Matched, Guaranteed to Run

Only Automated Packaging Systems manufactures genuine Autobag® bags-on-a-roll, SidePouch™ specialty bags, and AirPouch™ void-fill air pillows. We manufacture our bag and pouch materials with high-quality resins at multiple plants in the US to meet ISO 9001/2000 certification standards. Material uniformity and integrity exceed quality standards established by the FPA (Flexible Packaging Association).

Automated Packaging offers the industry's largest bag-on-a-roll manufacturing capacity to ensure your supply chain remains constant. We maintain over 100 million bags in stock for a wide range of bag packaging and void-fill applications.

Our poly bags are available in multiple materials, from basic polyethylene films to high-barrier co-extruded films. Engineered material types include:

- Linear low-density DuraClear™ polyethylene
- Low-density polyethylene
- High-density polyethylene
- Clear polypropylene
- Co-extruded, multi-layer
- Anti-static
- Scratch-resistant
- Rust-resistant
- Ultraviolet-resistant
- Mailbag
- High-barrier nylon
- Medical sterilizable
- Mil Spec
- Tarnish-resistant

We also manufacture custom bags with special printing and conversion options for unique, attractive packaging with a competitive edge. Special bag features include:

- Line, screen & process printed, one or two sides
- Edge-to-edge bleed printed bags
- Clear, tinted, opaque and combo bags
- Air relief holes
- Variety of hanger holes
- Easy-open perforations
- Reclosable zippers
- Tape bags and resealable flaps
- Tamper-evident perforations
- Compartment bags
- Gusseted bags

Custom Graphics Support

Our in-house graphics, design and imaging department assists customers in designing customized bag art, from creative consultation to pre-press requirements. Our expertise in printing on multiple materials ensures that your artwork is produced to the highest standards in the flexographic printing industry.

AutoLabel™ Thermal Transfer Ribbon

- *Guaranteed anti-static for longer printhead life*
- *Highly durable, resists scratching and flaking*
- *High density and contrast for superior print quality*

Automated Packaging Systems has a comprehensive network of factory-direct service professionals to assist you with all of your packaging needs. Our representatives are held to the highest standards to provide the best service in the industry.

Customer Service

The Customer Service Center at Automated Packaging Systems is organized to manage inquiries and requests with efficiency and speed. Our staff of highly-qualified, experienced representatives strive to exceed expectations by providing accurate, timely and thorough customer service. Ongoing technical and business skills training ensure consistent, high-quality customer care.

Technical Field Service Support

From general machine operating functions to diagnosing and correcting problems, our Technical Phone Support is available to help ensure your system continues to operate at peak performance. When on-site service is required, our team of factory-direct Field Service Engineers is the largest in the industry, and can usually respond within 24 hours.

Parts Availability

Automated Packaging Systems designs all of its bagging systems with the highest quality components. Maintenance is faster and more efficient with on-board diagnostics and simple Replace-n-Repair™ parts and assemblies.

Our comprehensive Spare Parts offering makes it easy for you to source and secure the genuine Autobag® and SidePouch™ parts you need, when you need them – without the potential for alternate source substitution, obsolescence, or out-of-stock issues that could arise with a third-party provider. We stock more than 8,000 SKUs in spare parts inventory, with fill rates averaging 94%.
