

# Preventive Maintenance Agreements

Custom Designed to  
*Increase Productivity and Profitability*

Downtime can cost your business thousands of dollars per hour. **Preventive Maintenance Agreements** from Automated Packaging Systems maximize the performance of your bagging system and extend the life of your equipment.

All work is performed by our factory-direct, trained service technicians. We know which parts wear the fastest, and we monitor and replace those components before they reach a point of reduced productivity.

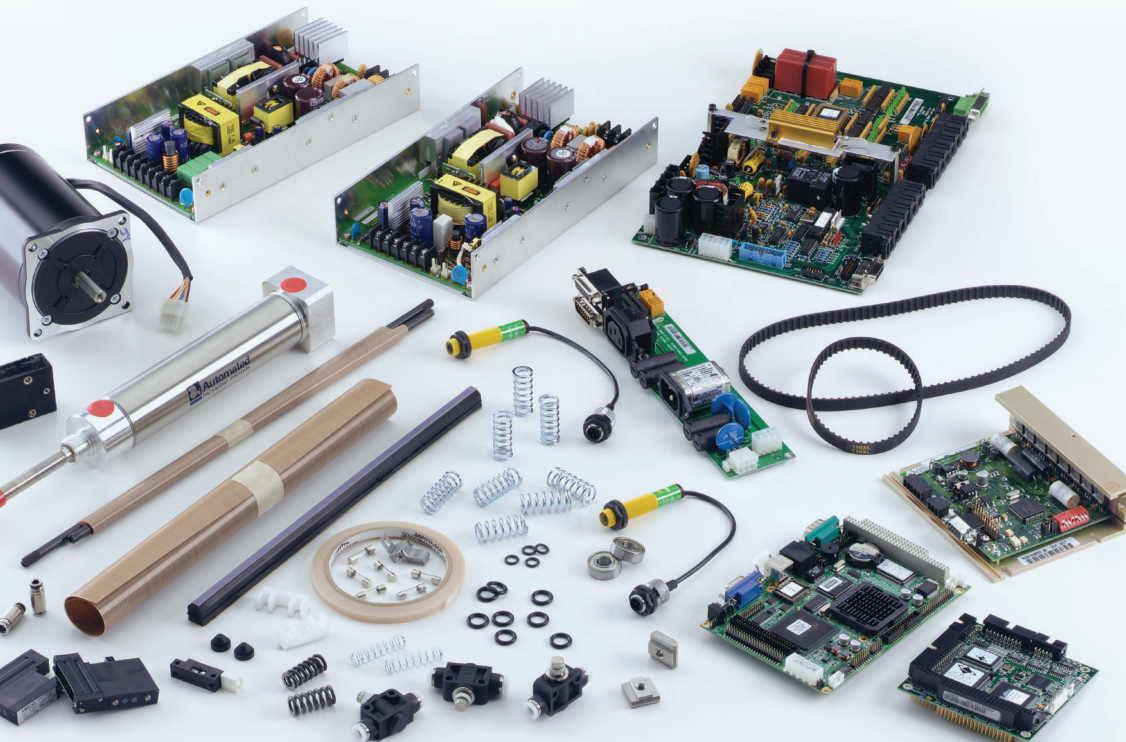

## We Customize to Meet Your Unique Requirements

Our programs are completely flexible to cover routine maintenance, replacement parts, labor, training and more, depending on what is best for your particular application.

## Increase Productivity by 20-30%

Our Preventive Maintenance Agreements typically increase overall productivity by 20-30%. Regular maintenance extends equipment life, increases uptime, and prevents downtime associated with costly emergency service calls.

**Systems Advantage™ Members Can Qualify for Discounts on Spare Parts Kits and Preventive Maintenance Agreements**

## What's Included

- Two service calls per year.
- Close inspection of all Automated Packaging Systems equipment under contract.
- Tightening of all screws, nuts and bolts.
