Experience the AirPouch® Difference

Dare to Compare!

Our exclusive, patented EZ-Tear™ perforations are preferred by packers because it’s more comfortable and faster to pack boxes with AirPouch.

Smooth Running from the First Foot to the Last!

AirPouch pillows are the only material that comes fan-folded in a box. There are no core issues and wasted material with AirPouch.

Ready, Set, Go!

Multiple AirPouch boxes can be staged at the machine so you’re not calling a time-out to find more material. Plus, our boxes sit closer to the floor, saving packers all that heavy, high lifting. Get faster, easier changeovers with AirPouch.

Surprise and Delight Your Customers!

Our EarthAware® Recycled pillows are widely recognized by consumers. With a minimum of 95% pre-consumer recycled content, you’re showing customers you care about the environment with AirPouch.
Cut Down on Maintenance!
(No pun intended)
Our exclusive, patented perforation eliminates the need for a blade to cut material. **Blades dull and cause downtime, but not with AirPouch.**

Ditch the Deflation!
AirPouch material is thicker, so it seals and retains air better than those flimsy films. **Reduce damages and returns with AirPouch.**

Made in the USA... by the Owners!
AirPouch machines and materials are made in America by us. As Employee Stock Owners, we are all vested in the success of our customers and each other. **Spread a little American Pride with AirPouch.**

Best of all – You WILL Save Money!
The AirPouch patented design allows more air into each pillow, maximizing yield and minimizing costs per cubic foot. **You will use fewer pillows to fill the same void with AirPouch.**
